## **PNEUMATYCZNE ZAWORY ODCINAJĄCE, GNIAZDOWE, INNOVA L-TYPE DO ZASTOSOWAŃ HIGIENICZNYCH**

Inoxpa

Pneumatyczne zawory odcinające, gniazdowe, INNOVA L-Type do zastosowań higienicznych/Pneumatic shut-off seat valve for hygienic applications.

The L type valve is a pneumatic divert single seat valve with diverging flow designed for hygienic applications. The plug is specifically designed to manage diverging flows, given that it closes against the direction of flow (inlet via the central body and outlet via the upper or lower bodies).

As standard, the lower body is the closure section, whilst the upper body is for diversion. Simply invert the actuator for upper body closure with diversion to the lower body. Easy to maintain with access to the internal parts by loosening the body clamp.

Open lantern allows visual inspection of the shaft sealing.  
360° adjustable bodies.

#### Materials

Parts in contact with the product AISI 316L  
Other stainless steel parts AISI 304  
Gasket in contact with the product EPDM

#### Surface finish:

Internal Polished  $Ra \leq 0,8 \mu m$   
External Matt

#### Available sizes:

DIN EN 10357 series A DN 25 - DN 100  
(previously DIN 11850 series 2)

ASTM A269/270 DN 1" - DN 4"  
(corresponds to OD pipe)

#### Connections Weld

#### Options

Double-acting pneumatic actuator.  
Gaskets: FPM, HNBR.  
Other connection types.  
C-TOP+ control unit.  
External position sensors.  
Steam barrier.  
Bodies with heating jacket.  
Internal surface finish:  $Ra \leq 0,5 \mu m$ .
