

WINEFICATOR WINEMATIC

WINEFICATOR WINEMATIC is horizontal construction of a tank for maceration of red and fermentation of white grapes. Speed control, mixing time interval and time-out, discharge and other functions are electronically controlled. Specially constructed mixing system ensures a slight but efficient mixing and also an automatic discharge of the tank. Geared motor ensures a slight mixing with adjustable speed of 0 to 5 turns per minute in both directions.

Basic equipment:

- manhole cover \varnothing 400 mm, 2 pcs
- vent valve DN50, PVC, 2 pcs
- closed legs, adjustable
- type plate with note card
- ladder support
- thermometer, analog
- sample tap, DN15
- manway door, rectangular, type 165
- manway door, rectangular, type Z175
- el. heater under the bottom
- heating pump

- automatic cooling, heating and mixing
- control
- el. box with touchscreen
- thermowell with PG9 fitting
- cooling jacket, 1.0 m²/1000 lit
- solenoid valve
- ball valve DN32 DIN11851, partial discharge
- ball valve DN65 DIN11851, total discharge
- brushed welds

Additional equipment:

- manhole covers other dimensions
- level indicator, ø16 mm, acrylic tube,
- scaled, open
- level tube ø24 mm
- valves (ball/ butterfly), Clamp, Garolla, WG, Macon, Gas, etc.
- mesh screen
- inert gas fitting
- caps on valves and fittings
- insulation 60 mm, PUR
- brushed and polished welds, Ra<0.8 µm

All sizes are in millimeters!
